Professional Summary

Computer Science & Engineering student at American International University-Bangladesh with a CGPA of 3.91/4.00 and Dean's List recognition. Experienced in full-stack web development with Next.js, NestJS, and ASP.NET Core, with hands-on experience building RAG-based AI applications and IoT systems. Published conference paper on an ESP32-based smart home automation system. Strong foundation in software development, databases, AI/LLM integration, and problem solving.

Technical Skills

- **Languages:** C++, Java, C#, Python, JavaScript, TypeScript, PHP.
- **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap.
- **Backend:** Node.js, Express.js, NestJS, ASP.NET Core
- **Database:** PostgreSQL, MySQL, MongoDB, Microsoft SQL Server, Oracle
- **AI/ML:** RAG, LLM Integration, ChromaDB, Prompt Engineering.
- **Tools:** Git, GitHub, Postman, VS Code, Visual Studio.
- **IoT:** ESP32, Arduino UNO

Work Experience

Personal Learning Assistant (Home Tutor)
[2023 – 2025]
Dhaka, Bangladesh

- Delivered personalized tutoring through customized lesson plans.
- Adapted teaching methods based on individual learning needs.
- Managed academic responsibilities alongside technical skill development.

Publications

- **Wi-Fi Enabled Smart Multi-Plug for Home Automation using ESP32 Microcontroller**
  Conference Paper
  researchgate.net/publication/398689918

Achievements

- **Dean's List Honors - AIUB**
  Fall 2024-2025 (GPA 3.97) and Spring 2023-2024 (GPA 3.95)

Education

- **Bachelor of Science in Computer Science & Engineering (CSE)** — **June 2023 – April 2027**
  American International University-Bangladesh (AIUB), Dhaka
  CGPA: 3.91/4.00
- **Higher Secondary Certificate (HSC), Science** — **2018 – 2020**
  Government Alimuddin College, Lalmonirhat
  GPA: 4.92/5.00
- **Secondary School Certificate (SSC), Science** — **2017 – 2018**
  Hatibandha S.S. High School, Lalmonirhat
  GPA: 4.44/5.00

Language Skills

- Bangla : Native
- English : Good professional proficiency in reading, writing, listening and speaking

Projects

- **Bangladesh Law Assistant Chatbot (Thesis)**
  Tech Stack: Next.js, NestJS, Firebase, and a Python search service on ChromaDB, with a local Gemma model running in LM Studio.

  - Developed a RAG-based legal chatbot using Next.js, NestJS, ChromaDB, and a locally hosted Gemma model.
  - Implemented query routing to direct legal questions to specialized law databases.
  - Designed retrieval and response generation using the actual text of Bangladesh Acts with cited legal sections.
  - Implemented Google authentication and persistent chat history using Firebase.

  GitHub: https://github.com/shihab1400/AinKhoj

- **Mental Health Support System**
  Course: Advanced Programming in Web Technology
  Tech Stack: Node.js, NestJS, Next.js, React.js, TypeScript, PostgreSQL, Tailwind CSS

  - Developed a full-stack mental health support platform connecting patients with healthcare services.
  - Implemented separate modules and access flows for free patients, paid patients, doctors, and administrators.
  - Implemented user registration and role-based access functionality for different user types.

  GitHub: https://github.com/shihab1400/APWT_full_stack

- **Tutor Management System**
  Course: Advanced Programming with .NET
  Tech Stack: Microsoft SQL Server, ASP.NET Core

  - Developed a multi-tier ASP.NET Core web application and API for managing educational courses, student groups, ratings, and recommendations.
  - Structured the application into separate layers for entities, data access, repositories, and presentation.
  - Implemented data management using Entity Framework Core with SQL Server.

  GitHub: https://github.com/shihab1400/dotNet_Tutor_MS

- **Programming Contest Management System**
  Course: Advanced Database Management System
  Tech Stack: Node.js, Oracle 10g, HTML, CSS, JavaScript

  - Developed a web application for efficiently managing online programming contests.
  - Implemented a centralized platform with separate functionality for administrators, authors, and contestants.
  - Designed the system to provide an organized and secure environment for managing contest-related activities.

  GitHub: github.com/shihab1400/ADBMS_Web_App

- **Wi-Fi Enabled Smart Multi-Plug for Home Automation using ESP32**
  Course: Microprocessor
  Tech Stack: ESP32, HTML, CSS, JavaScript, MQTT (HiveMQ)

  - Developed a Wi-Fi-enabled smart multi-plug for remotely controlling home appliances using a 4-channel relay module.
  - Implemented real-time temperature and humidity monitoring using a DHT22 sensor, with a safety buzzer for threshold temperature protection.
  - Developed a responsive web interface with MQTT-based communication, user authentication, and timer-based appliance scheduling.
